SILENT RUBBER PAVE

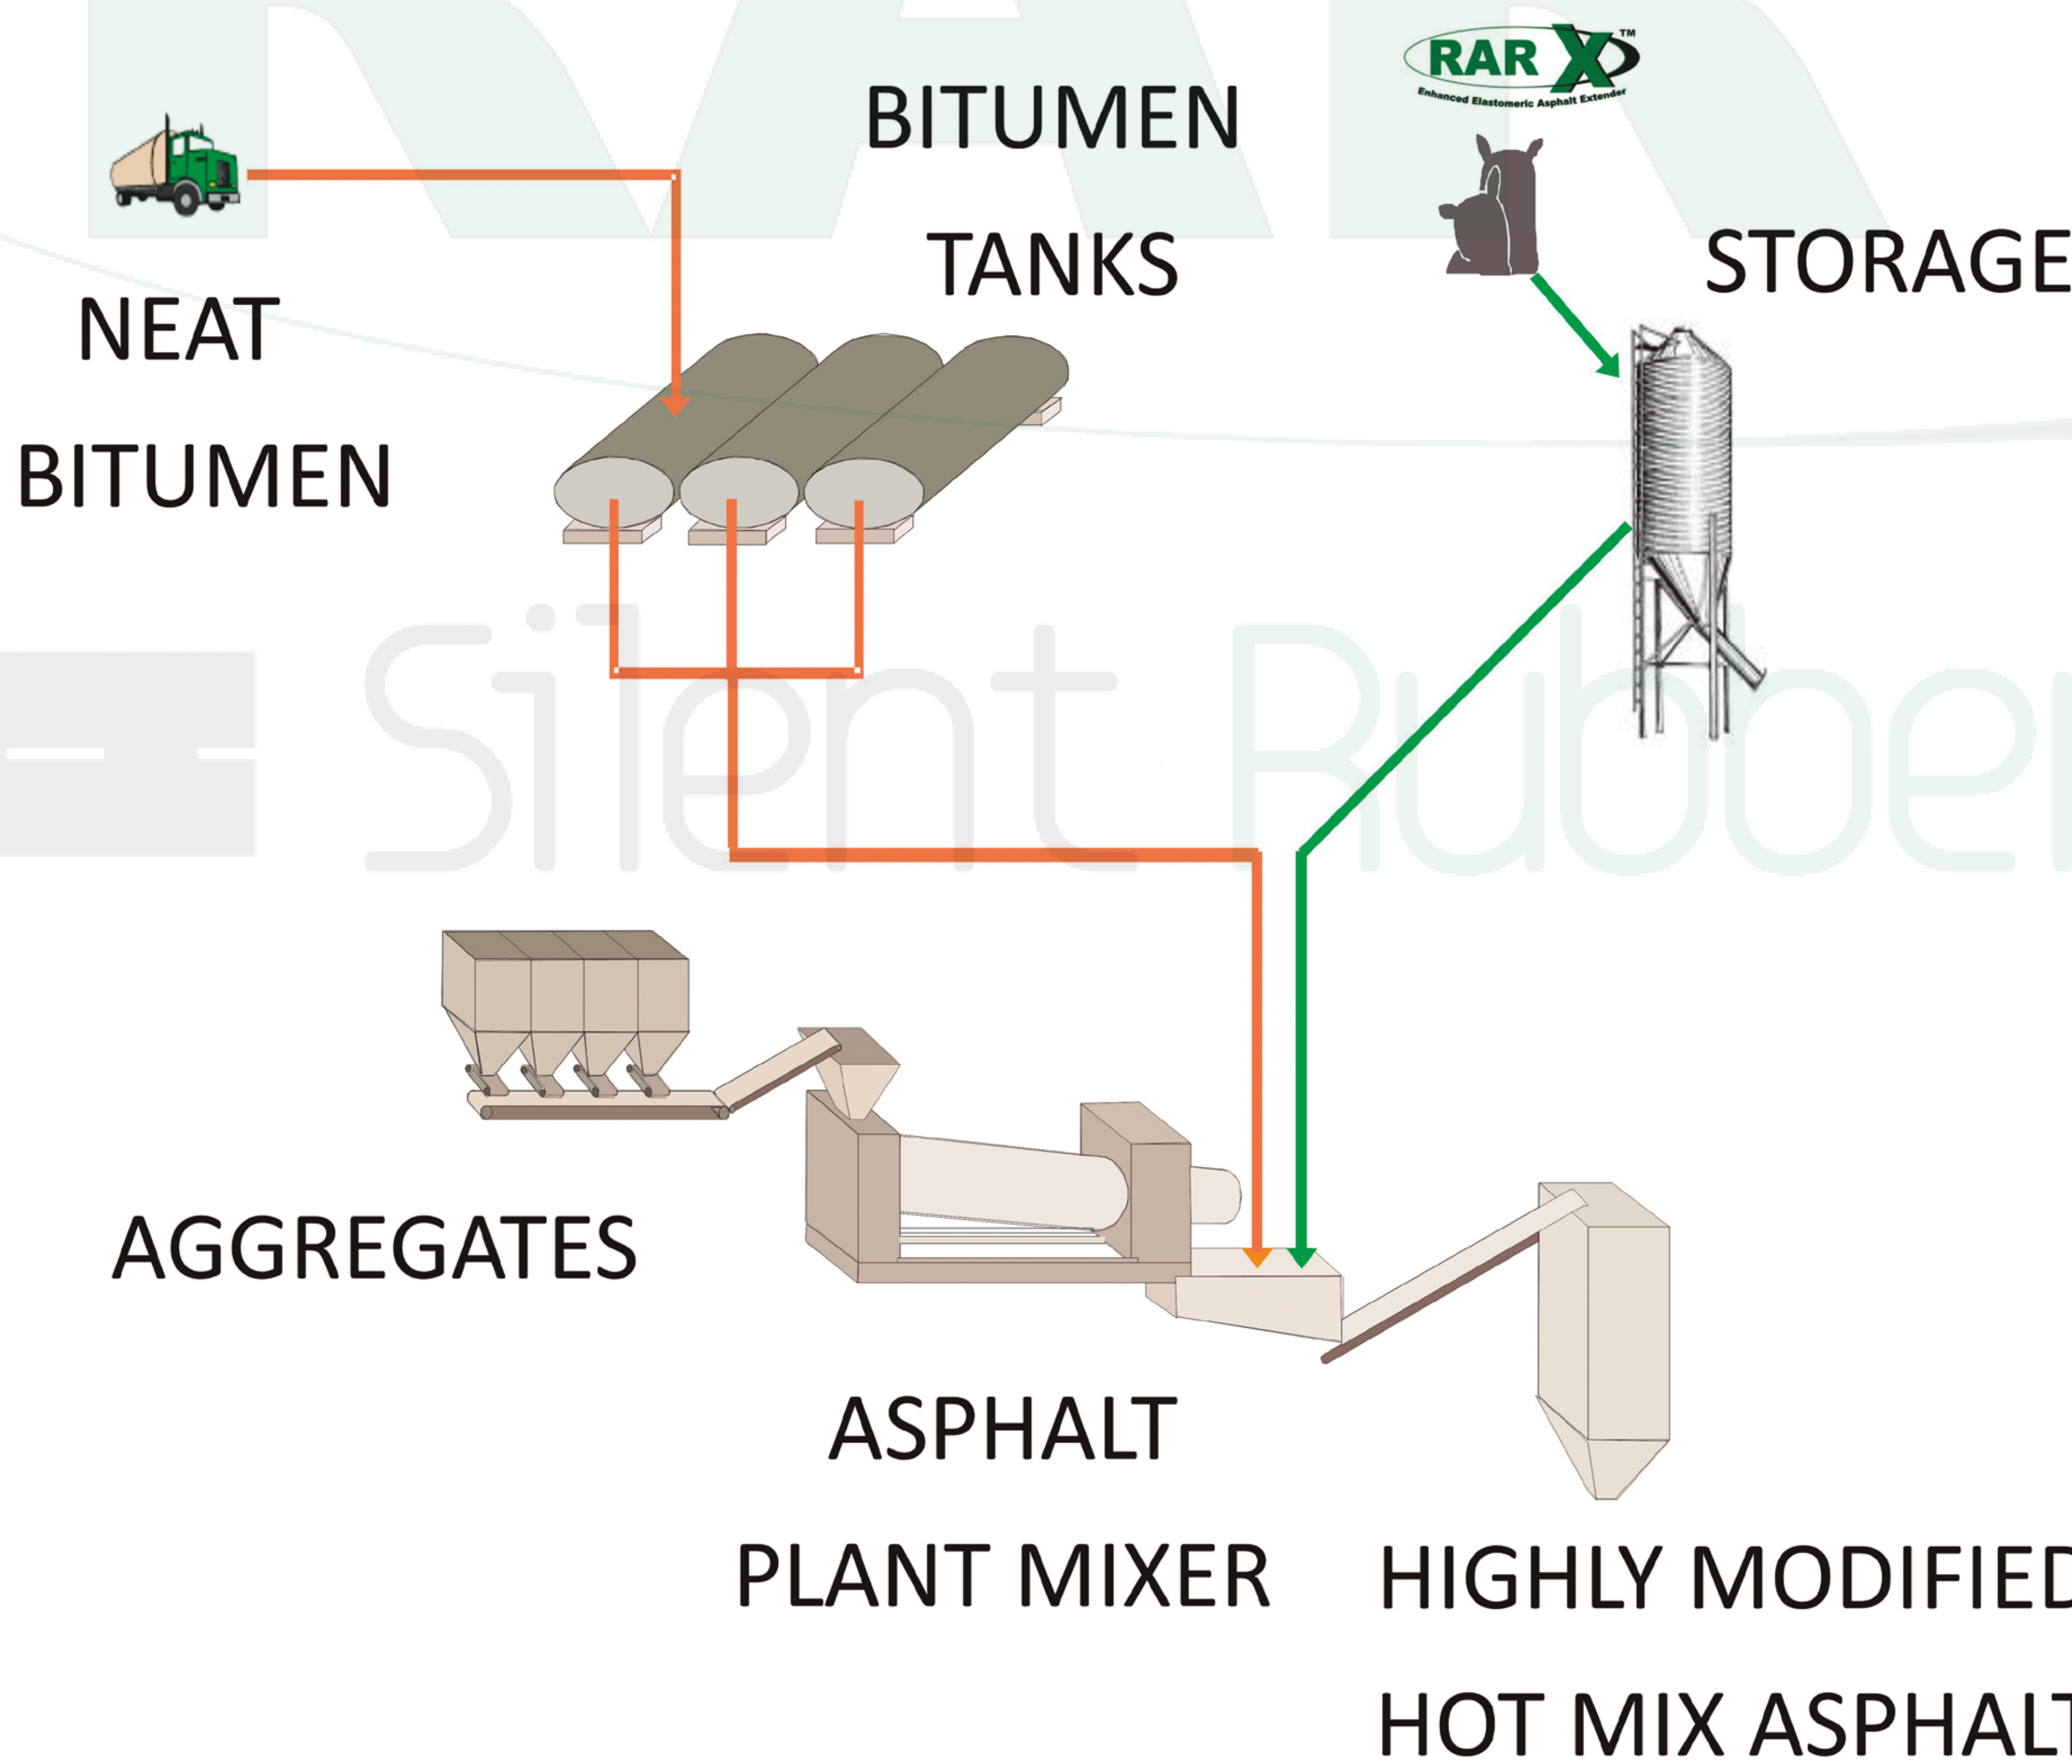

Accelerate the commercialization of **RARX** technology process in the global markets of **ECOLOGICALLY FRIENDLY SILENT RUBBER PAVEMENTS**

Project objective:

The project main goal is to market uptake and achieve a wider deployment of the RARX technology.

- Increase the production capacity of the plant of Valoriza to 5000 Tons/year
- Upscale the pilot plant of Consulpav to exceed 7000 tons /year.
- Develop two sections drivers (1km each) in two different climatic environments.
- Deploying a marketing product strategy.

REACTED and ACTIVATED RUBBER (components in optimized proportions and activating environment)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 760564.
